The Student Grades tab displays assignment, test and a list of term grades by course. Parents and students are able to see all grading tasks and grades and can easily view all assignments for a particular course including identifiers for any missing assignments.

After signing into the Portal select the grades tab on the left column.

You can view grades and assignments by term and class. Select the + sign next to the class and you can view the posted grades. Click on the arrow behind the grade and you can view assignments included in that grade.
Missing and late assignments and the grade for each assignment will show in this section.

For a quick view of recent updates to the gradebook, you can select **Grade Book Updates**. Click on the name of the updated assignment and it will show you the date it was assigned and due as well as the grade given.
